I searched the Foreign Patent Files and non-patent literature files, but did not come up any results for most of the files. The results I did get did not pull up any citations dealing specifically with the concept of multiple lot auctions with extension into overtime.

ABSTRACT EP 596643 A1

An electrical circuit interrupter device with a microprocessor based overcurrent trip unit which generates trip signals as an adjustable function of current and time, has a visual representation of the trip function on a front panel with 2-color LEDs associated with the trip function serving as indicators of trip conditions when red, and of a selected programmable parameter when green. The green LEDs flash to indicate a parameter selected for modification in a program mode and illuminate steady in a view mode.
